

Sgoura, Stella

B.Sc. TEI, Medical Laboratory Scientist (Technologist)

Miss Sgoura Stella is a Medical Laboratory Technologist, who specialises *in vitro* fertilisation techniques.

Stella graduated from the Department of Medical Laboratory Sciences of the University of Thessaly, in 2005. During her final year she completed her practice in the Hematology Department of the Hippocratio General Hospital of Thessaloniki, where she continued to work voluntarily until 2006.

In 2006 she became a member of the laboratory team of Embryolab where she was trained in all aspects of the laboratory techniques.

Stella is an active member of the Embryolab Academy and has participated in all the workshops held in Greece by the Academy (“Fluorescent in *Situ* Hybridisation on human Sperm”, “Cryopreservation of gamete, embryos and reproductive tissue: daily practice in your lab and clinic”, “Quality and Risk management in your IVF laboratories: from theory to practice”, Preimplantation Genetic Diagnosis”).

During the academic year 2014-2015, Stella attended and received a diploma for the supplementary programme of specialised education at the National and Kapodistrian University of Athens, titled “Human Reproduction”.
