

Eleni Taki, Biologist, MRes

Eleni Taki is a graduate from the School of Biology at Aristotle University of Thessaloniki (2009) and obtained her Master`s degree (MRes in Stem Cells and Regenerative Medicine) in 2010 from Newcastle University. In 2017 she completed her postgraduate studies in Human Reproduction (School of Medicine, Democritus University of Thrace). She has worked in a cord blood stem cell bank, and as a research associate at the National Hellenic Research Foundation in Athens in projects associated with mesenchymal stem cells differentiation and their use as an *in vitro* cytotoxicity model. She has been a member of Embryolab`s lab team since October 2017.
