

Achilleas Papatheodorou PhD., M.Med.Sc.

Senior Clinical Embryologist, ESHRE certified,

Lab Director

Mr. Achilleas Papatheodorou is a senior clinical embryologist with an experience of more than 20.000 cycles in assisted reproduction (ART), among which a great number of cases with severe male infertility and application of embryo biopsy for Preimplantation Genetic Testing. His scientific interests focus mainly on the aspects of vitrification technique on human oocytes, embryos and the cryopreservation of human spermatozoa.

In 2004, Mr. Achilleas Papatheodorou graduated from school of Biology, in Aristotle's University of Thessaloniki, Greece.

In 2005 he received his Master of Medical Sciences (M.Med.Sc.) degree in Assisted Reproduction Technology (University of Nottingham, UK).

In 2016 he was awarded with a PhD Degree from the Medical School of University of Ioannina. His PhD research project was the Clinical application of vitrification technique for cryopreserving human oocytes.

In 2017 he was certified by ESHRE as senior Clinical Embryologist.

Achilleas Papatheodorou has worked as a clinical embryologist in Thessaloniki, Athens, Albania and Italy. Additionally, he has worked as a scientific consultant of the IVF laboratory of San Carlo Hospital in Potenza, Italy. He has visited plenty of IVF clinics in Italy sharing his knowledge and technology with their embryology and andrology stuff. From 2019 is working in Embryolab, Fertility Clinic as Lab Director.

Achilleas has done numerous oral presentations in conferences and hands on workshops and at the same time is involved in research projects and training for all the modern ART lab techniques and is the author of a number of scientific articles, posters and chapters.

He is a member of the European Society of Human Reproduction (ESHRE), the American Society of Reproductive Medicine (ASRM), and the Greek Association of Clinical Embryologists (PEKE) in which currently he serves as a vice-president.
